MINING RECORDER'S OFFICE
—REMOVED TO—
OVER SILAS B. SMITH'S STORE
MAIN STREET, BODIE, CAL.
EO. McCARTNEY, Mining Recorder.

A CURIOUS ORDER.

Five Thousand People Homeless—One Million Dollars Taken from Settlers.

[Prescott Miner.]

Through the recommendation of agent Stout of the Pima Agency, and others of his stripe, the whole Salt River valley from the confluence of the Verde with Salt river, 18 miles wide and extending down the valley 34 miles, has been set apart as a reservation for old Chin-chi-a-cum and his filthy wards, numbering about 800 souls. The order has been made and signed by President Hayes. This new reservation, which is taken with a view to dispossess and rob 5,000 hard working, industrious citizens of their all, covers 25 surveyed townships, or 576,000 acres of surveyed land, and an equal amount of unsurveyed land, and takes in the towns of Mesa, Tempe, Hayden's Ferry and the large, thriving town of Phenix, worth $1,000,000. It was an ill-advised policy on the part of the people living in the valley, in the first place to have allowed these browny sons of the Montezuma race to occupy lands other than on the Gila, and the matter should have received the proper attention from both the Executive and military commanders. We trust that President Hayes will see what an injustice he has done, and rescind the order which is one hardly paralleled in the annals of history.

A Big Challenge.

It seems probable that the coming season will witness something remarkable in the way of double team trotting, either in a race or against time. Dr. Bonner and Mr. Work, of New York, will likely attempt to lower the time made by Vanderbilt's Lady Mac and Small Hopes, and that gentleman will also, doubtless attempt the feat. A recent issue of the *Spirit of the Times* contains the following immense proposition for a match of $100,000 to test the matter of who owns the fastest double team:

We are authorized by a gentleman to offer a match for $50,000 a side, half forfeit, on the following conditions: He proposes to trot a pair of his horses now (January 23, 1879), driven together on the road, against any pair in the United States filling the same conditions, a race of mile heats, best three in five, to wagon, over a mile track belonging to the National Association, not more than one hundred miles from New York city, to be named by him at least thirty days before the race, which shall occur on Saturday, June 14th, 1879, good day and track, if not, next good day and track. To be trotted under the rules of the National Association, the forfeit of $25,000 to be deposited on or before 12 o'clock of Wednesday, February 12.

Affairs in Newfoundland.

The *Newfoundlander* learns by letters received from the Channel and neighborhood that the late weather there had been most unfavorable for catching fish—heavy storms day by day with severe frost and a great deal of snow. The average catch of fish during January was about five quintals a boat.

A Burin letter of the 14th says: The condition of our people here, and it may be said generally around the bay, is most deplorable. I remember no year, for at least twelve years' back, when destitution was so prevalent and intense among our fishing population. The disastrously short codfishery of the past four years is this season telling on our people with fatal effect.

The Chas. W. Oulton, Captain Layton, arrived at Harbor Grace on Sunday last from Liverpool, having experienced during the first part of the voyage very heavy and boisterous weather. The sea broke over her, and did considerable damage, causing her so leak so badly that the two pumps were continually kept going. The Captain had to throw overboard all the moveable cargo. The crew requested the Captain to bear up for the nearest port in Brittan. The wind, however, changing to the east (which was right against him) he turned and made for Newfoundland, which he reached after a passage of 37 days.

A man who fell into a hole was congratulated on the fact that he didn't fall against anything. "But I did fall against something," he petulantly responded. "What was it?" asked a friend. "I fell against my inclination," he replied.

A jeweler being sent to prison, said to the turnkey: "If you'll let me out, I'll sell your watch for you to good advantage." "No, no," responded the turnkey; "instead of letting you sell my watch, I'll watch your cell."

A philosopher says: "The most dangerous period of a boy's history is when he begins to think his mother doesn't know enough to select clothing for him; but, if she has energy and muscle, he may yet be saved."

"The worst dose of 'hop bitters' I ever had," said a young man, "was the other night when I took a girl to a hop and some other fellow danced with her every set."

BODIE MORNING NEWS

WEDNESDAY, - - MARCH 19, 1879.

THE BODIE MORNING NEWS has the largest circulation of any paper published in Mono County, and is being rapidly extended. Advertisers will please note this fact.

C. W. CRANE, Room 10 Safe Deposit Building, has been appointed Agent for the Bodie Daily News in San Francisco. All orders delivered to him or contracts made for SUBSCRIPTION or ADVERTISING will be recognized by the Publishers.

BOOLE & ELLIOTT.

DENIS KEARNEY.

We may soon expect to see the workingmen's agitator make his advent here in Bodie. He is now swinging around the circle, making his characteristic speeches in various places. We notice a disinclination, on the part of several of our exchanges, to more than pay passing notice to his addresses, which fact goes far to prove that he succeeds in making a deeper impression on his listeners than would hardly be admitted. Whatever may be said of Kearney and his manner, we cannot afford to ignore the real issue he advocates. His cause is one which seems to gather strength with time, and appears to be gaining a firmer hold on the minds of the majority, who form the laboring or poorer classes of society. As constant dripping wears away the stone, so does persistent agitation on any subject make converts to the faith preached. We can say positively that we are not an advocate of the style of Kearney's remarks; we cannot listen with anything like patience to the vulgar and uncouth expressions indulged in by him, but none can deny that, underlying the barbarous language affected by Kearney, there is much of truth in many of his statements. The great agitation throughout the country, which has attracted the attention of several of our brightest minds, both in Congress and among outside thinkers, is the question of labor and capital. In the history of all great revolutions everywhere the initiatory has generally been taken by the so-called lower or working classes of people. With great wealth and almost limitless power comes arrogance, pride and tyranny. Naturally the weak go to the wall for a time, until forbearance ceases and revolution begins. In this country we believe that the question as between the rich and the poor can be settled without recourse to violence, but concessions will have certainly to be made by both factions. The rich must remember that they have responsibilities which accompany their good fortune, while the poor must also be made to believe that a fair and equal chance will be given them to earn the bread necessary for the support of their families. The worst sort of an aristocracy is that of a purse-proud, monied class, who, knowing nothing of the finer feelings born of education and its concomitants, suddenly leap into the possession of riches and the accompanying shoddy adulation it brings in its train. To this class are the poor indebted for much of the oppression to which they are subject, and not to that portion who are students and philantrophists by nature, and whose tastes are indulged by having time in which to gratify them. We believe that the Kearney agitation, so-called, is destined to work a great revolution in the conduct of our government, and that this change is not far distant.

A MERITORIOUS OPINION.

For years we have been personally acquainted with M. Attwood, F. G. S., and can confidentally endorse him as a gentleman whose opinions on mining matters are entitled to credit, and such as to gain for him a front seat among the experts of this or any country. In the *Mining and Scientific Press* of the 15th instant, we find an interesting paper which was read by Professor Attwood before the California State Geological Society, and from which we take the liberty of copying. The subject was "On the Wall Rocks of the Bodie Auriferous Lodes," and is one which we would like to copy "in extenso." He says: "I have every reason to believe that the lodes of Bodie, so far as developed, exceed in richness and extent those of any other district yet discovered in California. For instance, to the best of my recollection, the richest gold rock ever milled at Grass Valley, in any quantity, was taken out of the Allison Ranch mine in 1856, and treated at the Gold Hill mill, then under my charge. The parcel consisted of 21 tons, and yielded at the rate of $375 to the ton."

Following this we read disquisitions upon the geological formations of several of our leading mines, in which the learned gentleman mentions the "birds'-eye porphyry" found in the Belvidere and other mines, and which is called, scientifically, "trachyite diorite." As a comparison between the extract given above we clip another statement from this very interesting paper which reads as follows:

"I have heard from good authority that a large parcel of between 900 and 1,000 tons of veinstone was taken from the Bodie mine and averaged in gold upwards of $600 to the ton. This would be the richest rock in quantity that I ever remember seeing taken out of any California mine."

In conclusion, Professor Attwood makes use of these words, which we take the liberty of borrowing from him as really expressing our own ideas: "The application of the microscope in these investigations is, however, absolutely necessary, and I am in hopes the day is now past when such remarks as that 'mountains should not be looked at throug. microscopes' will not be listened to by any intelligent person."

THE Bodie stocks have advanced because of a growing confidence in the future of the Bodie mines. The features of this week have been the rise in Blackhawk and Bechtel—both Bodie Bluff stocks. The Blackhawk development promises well.—*Stock Report.*

We are pleased to note the growing confidence in the future of the Bodie mines, and can assure our city friends that their faith is not misplaced. Within a few weeks we are satisfied that other and important developments will add to the outlook now so promising.

J. F. HALLOCK, State Controller of Nevada, has notified the Board of County Commissioners, of Washoe county, that the rate of taxation for State purposes for the present fiscal year is 55 cents on each one hundred dollars valuation. The State tax last year was 90 cents.

How Blummer Takes It.

"Did you notice this yere new kink in the Eureka papers?" remarked Blummer to his cronies, as he made a second lead of trumps in an attempt to reach his opponent's pedro, "I mean this religious business they dish up along the last of the week, conundrums in the Bible class and subjects for sermons. My old woman," he continued as he swung the ten and gathered in the coveted five spot, "My old woman, she reads them are items to me on a Saturday night, and says, Blummer, there's a great moral work going on in this community, and yer must join the movement. Its reached the newspaper men, and there's hope for yer yet, if you'll quit your evil ways, and sit under the drippings of the pulpit. And then the old gal tosses another scrap at me, and says its my turn now. You used to read to me those horrid stories of Major Dennis', about the gals at McGarry, and fragrant delicacies and double tenders, as he called them and like an old sinner, you was allus smacking your lips, and saying they was meaty and juicy, and that the Major was a spicy old cock, but the leaven of salvation has reached the town, and things is different from what they used to was. Boys, she's right—brandy and peppermint, Jim—what 'll you take gentlemen—things are diffe ent. Them days a preacher was one of the boys, and Parson K— would jine you in a sociable drink or play a deal of farrer, then rastle with you in a pious sort of way that were most convincing, and offer to bet five dollar hat he would convert you at one setting. They don't do it now. They are running the gospel mills at high pressure—four churches of a Sunday; and prayer meetings, socials, festivals, concerts and domino parties sandwiched through the week, and I reckon the old woman's right. I did have some hope that us fellows what were steeped in sin—that' the way she puts it—would have a chance to sort a slide along easy, until I saw this new dodge in the newspapers; but when they fetches them, we might as well throw up our hands and call it a cinch." And then Blummer pensively shuffled the pedros down to the bottom of the pack, and dealt himself the boss hand, while his companions sympathizingly shook their heads, and acquiesced in the general pointedness of his complainings. Blummer is right. He only stated the situation in his profane way, but there is no doubt that he is correct in the tenor of his remarks. The earnest work being done by the little band of ministers is having a good effect, as crowded churches and thronged Sunday schools fully prove. The wild days of a rough mining camp have passed away, and the morality of an older civilization is having its due effect. Blummer and his ilk will have to stand aside, or swim with the current.—*Eureka Leader.*

A little boy asked his mother if fish were not thieves. She told him she guessed not, and wanted to know why he asked the question, to which he responded: "Well, ma, I thought they must be, because it is so common to see a fish hook!"

BODIE AND VICINITY.

Many persons are anxiously looking around to find out the meaning of the lettters P. P. P., which heads an announcement for a meeting. We were asked the conundrum, and gave it up.

We understand that a large building will soon be erected on the lot next adjoining the one erected by W. C. Land recently. Colonel McClure, of Hollister is the projector of the enterprise, and will soon commence work on the same.

Quite an excitement exists among the holders of land on the Waltz tract just now. The location was made under the Desert Land Law and is being disputed by the majority of occupants. Probably the matter will again figure in the Courts.

We call attention to the new advertisement of Mrs. H. D. Morris, dressmaker. This lady comes well recommended from various parts of the State of Nevada and San Francisco as a first class dressmaker. We commend her to the attention of the ladies of Bodie.

They are about organizing a new fire company at Aurora and friend Dormer eulogizes the citizens who have been liberal in their donations. Ellis Drake has donated a lot in an eligible locality and receives the thanks of the *Herald*.

It is rumored that the Miners' Union have decided to raise their building and make it two-stories. The upper floor will be occupied by the Masons and Odd Fellows jointly, while the lower one will be rented out. Should this enterprise be completed the building will be one of the largest in town, and will prove a remunerative one to the Union.

Fooled.

The other day the gude wife of one of our residents thought she would fool a setting hen by placing glass eggs in the nest. The ruse succeeded in two ways. The hen, of course, was fooled, and so was the man or person who came under cover of darkness and stole the decoy eggs. We believe our friend will repair his wood house door so that thieves cannot come at night and play another joke on the hen.

Busy.

Phlegar, Deputy Postmaster, is one of the busiest men in town. From the time of the arrival of the mail until late in the afternoon the calls upon his attention are frequent. He is competent to fill the position and deserves credit for his urbanity and courtesy under the trying ordeal to which one in his position must necessarily be subjected. Certainly he is the right man in the right place.

LETTER FROM KEITH DISTRICT.

New Discoveries and Explorations —Cheering Prospects—Etc, Etc.

EDITOR NEWS: The local interest in the mining outlook of Keith District remains unabated. Late developments of the Oakland Consolidated company insure the certainty of establishing a good camp in this neighborhood during the approaching season. This company have run a tunnel along their ledge a distance of 80 feet, and the ledge carries an average assay value of $290 16 per ton, with a width between walls of about three feet. The ores of this district are free milling, and their assay values consist of gold, except three or four per cent. of silver. There are several rich placer locations in this district, two of which have been thoroughly prospected and for which capitalists are now negotiating a purchase, with a view to an extensive operation in gravel mining. These claims have been worked and prospected by a number of old placer miners, and they pronounce them the richest and most favorably located of any gravel washes on this side of the mountains. Locations are being made daily, and prospecting is being diligently pursued all through the hills in this section. Mill sites have been located up Little Mormon Canyon by Bodie parties, and it is generally understood that the Oakland Consolidated Company are to commence the erection of a ten stamp mill, just below their claim, early next month. The Superintendent of the Oakland Company, Mr. J. W. Zen, has incorporated the Mexican claim, and will be up from the Bay in a few days and commence operations on this valuable mine. The Union Pacific claim, located by C N. Sawyer, late Recorder of Keith District, is attracting general attention by the richness of the ore struck in the incline at a depth of about 40 feet, assays of which compare favorably with Bodie rock at a like depth. A general view of the mining situation in our young district certainly indicates cheering prospects in the future. RECORD.

NOTES ON THE ROAD.

Superintendent Pratt of the Bodie and Genoa Telegraph Line was at Goodenough's on Sunday with some friends. It was understood that they were all out on official business, to be connected with the line to a limited extent; the line to be understood as that which fishermen most enjoy, and the remainder of the business to be devoted to killing California lions, but whether by hasty dispatch or not, still remains untelegraphed. One of the most singular things this well-stocked official hunting party had with them was a fine-tooth comb.

Sam Fields, of the Hot Springs Hotel, is doing a lively business. He had no less than three teamsters, five invalids, two aristocratic travelers and two transfers on his hands Sunday night. He expects to have his hotel fully completed and open for guests in a week or two. One of the progressing improvements is a large pool, with an inclined, slated floor, for bathing in hot mineral water in the open air. A perspiration room and an adjoining apartment with bath tubs in it are almost completed now.

It is the intention of the Bodie and Genoa Telegraph Company to change the location of a portion of their line so as to shorten it and increase its efficiency.

The road from here to Carson, via Antelope valley and Genoa, is in very excellent condition. An additional force of workmen were put on near Bridgeport, yesterday; $3 a day and board themselves.

Men working in the canyons near Genoa, getting out and handling wood, are paid $2 a day and board now.

Correction.

Aside from corrections made by a courteous contemporary last evening, we have to add that the types made us say yesterday "the expenses of the Bechtel mine had been reduced from $55,000 to $22,000 per month." The figures should have read "from $5,500 to $2,200." Also, we owe an apology to Superintendent L. N Dougherty, whose name was inadvertently omitted in the review. Friend Dougherty has been suffering from a hurt received by a fall which rendered him incapable of joining the visitors on Sunday in their trip through the mine. He, however, was able to receive, and did the honors in his customary, hearty manner. We trust he may soon be able to attend to his outside duties.

Tired Dancers.

Yesterday was a rough day for such as participated in the festivities of the night before at the ball given in aid of the Catholic Church. To be up all night at a dance is no joke, and makes one inclined to stupidity the next day. Many of those who danced all night were sadly used up, and were inclined to foreswear ever again attending a dance.

Incorporated.

The Noonday Mining Company has been incorporated to mine in Bodie Mining District. Capital $10,000,000. The Directors are R. C. Hooker, George R. Root, William J. Taylor, G. A. Holden and William B. Carr.

WHAT THEY SAY OF US.

The Bodie MORNING NEWS, a neat appearing and newsy little paper of 24 columns, comes to hand. It is published every morning except Mondays, by S. F. Hoole.—Bedding *Independent*.

We have received a copy of the Bodie MORNING NEWS—S. F. Hoole's paper. This copy is bright and newsy and we hope Bodie will prove an ample field for two good newspapers.—Virginia City *Enterprise*.

We are in receipt of No. 1, Vol. 1 of the Bodie MORNING NEWS. This is Bodie's latest journalistic venture. The publisher and proprietor, Mr. S. F. Hoole, is a veteran journalist, and his new journal shows care and skill in every department.—San Francisco *Stock Report*.

The first number of the Bodie MORNING NEWS, published by S. F. Hoole, is received. It is a handsome paper, and is well filled with local and general news with a good display of advertisements. We wish the NEWS success.—Winnemucca *Silver State*.

We are in receipt of the initial number of this new aspirant for public favors, which made its appearance at Bodie last Saturday morning. It is an exceedingly nice paper, and we hope our friend Hoole will meet with a liberal support.—*Nevada State Journal*.

The initial number of the Bodie NEWS is at hand. It is about the size of the *Tribune*, and brims over with spicy matter. It starts off with a healthy show of advertisements. Brother Hoole has experienced much adversity of late. We trust that he has seen the worst, and that soon he may be prosperous and happy. Long live the NEWS.—Carson *Tribune*.

The Bodie MORNING NEWS is the title of an exchange that has just reached us. It is owned and conducted by S. F. Hoole, formerly of Reno, and is a bright, readable paper. The gentleman's journalistic ability is assurance that it will be well conducted, and the new enterprise will doubtless win a foremost place. We wish the NEWS abundant prosperity. —Eureka *Leader*.

We received the first number of the Bodie MORNING NEWS, issued on Saturday by S. F. Hoole, late of the Reno *Daily Record*. In typographical appearance and general make-up the NEWS will compare favorably with any paper on the Coast, while its editorial, local and news columns give evidence of care and ability. Such a paper certainly should succeed in an active camp like Bodie. May it live long and prosper.—Eureka *Sentinel*.

We have received the first number of the Bodie MORNING NEWS, published at Bodie, California, by S. F. Hoole. It bears the impress of careful compilation, and will be welcomed by all who are interested in Bodie mines or stocks. It announces strict attention to Bodie interests and it should be well patronized. We wish the NEWS and its proprietors success, and extend to them a cordial greeting. —Chico *Enterprise*.

The first number of the Bodie Morning NEWS came to hand on Tuesday. It is a neat paper, typographically, and no doubt will find a lucrative field in the growing camp of Bodie. Hoole & Elliot are the proprietors, and both being gentlemen of experience in the newspaper business, will, no doubt, give their readers a paper second to none in the county.—Esmeralda *Herald*.

We are in receipt of the first number of the Bodie Morning NEWS, by S. F. Hoole. It is an exceptionally well gotten up paper mechanically, and the matter gives evidence of ability. The proprietor announces in his first issue the destruction of his dwelling at Reno, and everything he possessed. Rather a discouraging start, but we hope that he will soon see how all things happen for the best.—Colusa *Sun*.

We received to-day, a copy of the first issue of the Bodie Morning NEWS, a bright and newsy daily, published by S F. Hoole, formerly of the Reno *Record*. The publisher had the misfortune to lose all his worldly chattels by the late Reno fire, but is grateful for the material aid of friends and the sympathy of the public, expecting through these auxiliaries—and his own unflagging efforts, to re-establish himself upon a sound financial basis, and that he may be eminently successful in his present undertaking, is the luck we wish him.—Elko *Independent*.

S. F. Hoole, with his Reno *Record*, moved away just in time to escape being burned out by the recent conflagration which devastated that ill-fated town. On Saturday last he issued the first edition of the BODIE MORNING NEWS, recording among other items the destruction of Reno, and all his property; turning his family out of house and home in mid-winter. Hoole, doubtless, thinks now is a good time for his family to move also to Bodie. His new daily paper is a good-sized, neatly printed sheet, well filled with choice reading matter, original and selected, and bears a decidedly newsy, wide awake look. With the good advertising patronage it shows, the NEWS should be a success and well appreciated by the people of Bodie.—*Gold Hill News*.

Personal.

Sheriff P. B. Taylor has been in town a few days. He is on official business as usual, and we met him in Judge Goodson's court room, looking as jolly and hearty as ever.

E. J. Elzy, whom we have known for many years in Eastern Nevada, was here on a visit yesterday. Mr. Elzy is now interested in Washington District, where he has been operating for some months.

F. W. King, a livery stable man of many years experience in San Francisco and elsewhere, arrived in town on Sunday last. Mr. King comes with the intention of starting the livery business here. He has some of the best stock ever driven over the road to the "Cliff," and says he intends to bring them all to stock his new stable. He cannot fail to do well.

Dull.

Main street presents at night a dull appearance during the middle of the month. Those who are speculatively disposed, invest their earnings in stocks of different kinds and have no money to spend, and those whose business calls them to labor at day go home early at night. Consequently the streets, at 11 o'clock, become deserted and most of the saloons close. Occasionally a gala night is interspersed among the dull ones when factious and belligerently disposed parties agree to settle their little disputes by an appeal to the pistol. Then the streets become alive with spectators and the town seems awakened as by magic. The first of each month enlivens the aspect of affairs and for a few days the saloons do a thriving business. Soon we may expect the advent of another season of activity as pay day is not far off.

New Building.

M. Mareen, a gentleman lately arrived here, has commenced the erection of a fine two-story building on upper Main street, nearly opposite the Bodie House. The builder informs us that the house is to be used for a drug store and shoe store on the lower floor and a lodging house on the upper. When completed this will be one of the best built houses in town and will add much to the importance of the upper part of Main street. We shall soon be placed in possession of the names of the intended occupants and will furnish them to our readers through the advertising columns of the NEWS.

The Standard.

We understand that since the increase of the number of shares of the Standard Mill and Mining Company, the amount of dividends will be reduced to fifty cents per share. The same quantity of bullion will be turned out each month, and the stockholders will receive the same amount as heretofore, their shares having been increased two for one. It is the intention, we are informed, to add to the milling capacity by putting in some additional stamps.

Removed.

J. M. Abbott, the well known furniture man, has removed from his former place of business to the building owned by Silas B. Smith, corner of Main street and Standard avenue. We dropped into his place yesterday and found him busily engaged putting his house in order. As soon as he becomes settled he promises to inform the readers of the NEWS of the fact in a proclamation. He is one of the best workmen in the line of paper hanging and decoration in town.

Job Printing.

We desire the people of Bodie to understand that we are prepared to do all sorts of job work, in the best style at low rates. Our job office is superior to any in Mono county, and we are prepared to do all kinds of work in a satisfactory manner.

A partner is wanted in a butcher shop with a good established business. A practical butcher preferred. Must be a good business man. Enquire at this office. 6-6t

Those desirous of buying two splendid billiard tables of the latest and most improved pattern can be suited by applying to Land & Co., corner of Main and Green streets. *9tf

BODIE MORNING NEWS

WEDNESDAY, - - MARCH 19, 1879.

NEW CHINA.

California's Asiatic Colony.

A correspondent of the San Francisco *Chronicle* says:

Our coast is the only convenient threshold that is open to the old East; our shores glitter with fabulous gold; our streams are indeed silver. Even the half-shut, heavy-lidded Mongolian eye brightens at the splendid spectacle, yet up to 1851, inclusive, not more than 3,000 or 4,000 Chinese had arrived in California. This was a very small proportion of the horde of Argonauts that fell upon these shores, greedy for gain. In 1852 18,000 burst upon us, and even then awakened the fears of the white settlers. Stringent measures were adopted to discourage immigration from that quarter; result, not more than 4,000 arrived during the following year. In 1854 a tidal wave brought 15,000 to the coast, but for fourteen years following the average arrival was less than 5,000 per annum. In 1868 the incoming tide increased, and up to the present time we have received from 10,000 to 15,000 yearly. Before 1868 not less than 50,000 Chinese had crossed the Pacific. The immigrants secured a steerage passage to this country for $50, which includes subsistence from port to port. The majority of them furnish their own bedding, but if they are unprovided the ship affords passable accommodations. Every coolie is consigned to one of the Six Companies, and by contract is compelled to labor for a term sufficient to reimburse his company for the passage money advanced, and for insurance or protection against sickness or injury. Each man

ON HIS RETURN TO CHINA

Leaves $5 with his company, which may be called his graduating fee. The companies also derive a revenue from the tenement system; the secret tribunals, with despotic authority, pass sentence on delinquents and lawbreakers, involving all degrees of punishment, even that of torture and death. The system may be regarded as more cruel than African slavery, yet a kind of free masonry among them compels their silence, and we know little or nothing of the secret government of the 200,000 Chinese on the Pacific coast. Vice-Consul Bee has lately stated that our Chinese population is rapidly decreasing, and that there are now not more than 60,000 subject to our laws. He adds that as emigrants to China we outnumber the coolie immigrants, a revelation which is as startling as it is absolutely false. They care little for our laws and customs. Not one in a thousand shows the influence of his association with the whites beyond his temporary adoption of a slouch hat, narrow-cut trousers and a pair of clumsy boots three sizes too large for him. They are not in natural sympathy with our institutions, and few of them care to acquire the language. The lads who attend irregularly the Sunday-schools seem to

HAVE BUT ONE MOTIVE.

It is to become familiar enough with the English tongue to make them acceptable as servants in English and American families. The home missions labor almost fruitlessly with these sordid, imperturbable and penurious people, who seem to have but one idea, which is to get money. Little China in the heart of San Francisco is in no wise dependent upon the great wall of whites that surrounds her. If we were all to pack up and desert the peninsula to-morrow, Little China would survive and flourish. We are nothing to her but a hindrance. We occupy the dwellings she covets, and which she is gradually and stealthily creeping into. The alien race has spread like vermin. From the smallest beginning it has increased and multiplied until now, like a foul overflowing fountain, it is much or more than we can do to direct its swelling tributaries into safe channels and avoid for the season the impending flood. We have touched but the shell of this human hive; let us plunge into its dark cells and see if it be honey that we find there.

PUNGENT.

A little girl who had been very observant of her parents' mode of exhibiting their charity, being asked what generosity was, answered: "It's giving to the poor all the old stuff that you don't want yourself."

An artist, who was out looking for subjects for sketches, saw a flock of geese standing under a porch, and whipping out his sketch book he at once proceeded to secure the porch o' geese (Portuguese) scene.

A widower who had recently buried his second wife, proposed to a lady, and she scornfully remarked; "No, thank you. I'm opposed to a third term, under all circumstances."

A saddler was talking about a new style of surcinge which he had got up, when one of the company pointed to a miserly old bachelor that was passing and said: "There's the meanest sir-single in this village."

If a man is in the habit of giving his word to people, how can he be expected to keep it?

It is a pretty generally acknowledged fact that belles are apt to give tone to society.

An uninteresting period in boyhood—waiting to be whipped.

A good way to curb a wild young man is to bridal him.

The horse is usually an oated animal.

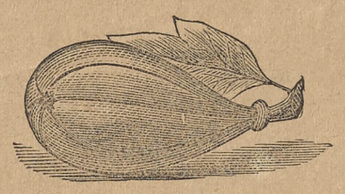
MEDICAL.

THE LATEST & GREATEST DISCOVERY.

Dr. J. De PRATI'S

HAMBURG FIGS!



A CRYSTALLIZED

FRUIT CATHARTIC.

A DISCOVERY OF THE GREATEST interest to the Medical Profession. A boon to every household. A most delicious laxative or purgative, prepared from fruits and vegetables. So perfectly harmless that they may be administered with entire safety to an infant. So efficacious to adults that a single dose will prove their value, and so elegant a preparation that it needs only to be presented to the public to become a necessity in every household throughout the land.

For Liver Complaints, Habitual Constipation, Indigestion, Dyspepsia and Piles,

they are a specific. To travelers by sea and land they will be found invaluable; they are positively unfailing in their action, and this is the only medicine ever offered to the public that is acceptable to the taste, and so pleasant that children will eat the figs as eagerly as candy.

For sale by every Druggist and Grocer throughout the United States and Canada. Price, 25 cents a box.
